Understanding the Compass Test: Types and Formats

The Compass (Computerized Adaptive Placement Assessment System) is a series of standardized tests designed to assess a student's academic skills in reading, writing, and mathematics. Unlike a typical standardized test that provides the same questions to every student, the Compass utilizes a computer-adaptive testing (CAT) system. This means the difficulty of the questions adjusts based on your previous answers. Correct answers lead to harder questions, while incorrect answers result in easier ones. This adaptive nature provides a highly accurate assessment of your skills within a relatively short testing window.
