The term "classic Land Rover" typically encompasses models produced before the late 1980s, although some enthusiasts extend this to include early Discovery models. This buyer's guide will primarily focus on the Series Land Rovers (Series I, II, IIA, and III) and the early Range Rovers. Each model possesses its own unique characteristics, strengths, and weaknesses.

- **Series Land Rovers (Series I, II, IIA, III):** These represent the quintessential Land Rover, known for their simple, robust design and incredible off-road capability. The evolution across the series saw improvements in comfort and features, but the core design remained largely unchanged. - **Early Range Rovers (1970-1986):** These offer a more refined and luxurious experience compared to the Series models, while still retaining impressive off-road capabilities.
